

Can Hospice Help You?

Has one of your patients...

- Been hospitalized or to the emergency room several times in the past six months
- Fallen several times in the past six months
- Experienced shortness of breath even at rest
- Been told that there is a limited life expectancy
- Started to take increasing amounts of pain medication
- Been spending the majority of time in bed
- Called more frequently in the past six months
- Experienced unexplained noticeable weight loss
- Started needing help from others with:
 - Walking
 - Eating
 - Bathing
 - Cooking
 - Dressing
 - Getting out of bed

If one of your patients is experiencing two or more of the symptoms listed above, Hospice of Palm Beach County can help now. We're there, 24/7, committed to increasing access to hospice services for everyone who needs care. Hospice is a covered benefit by Medicare, Medicaid and many private insurers.
